

ADDITIVE C-150 MARK A

Specification 38.101685-84	Average alkaline synthetic calcium sulfonate in mineral oil.		
Characteristics	Minimum	Typical value	Maximum
Kinematic viscosity at 100 °C, mm ² /sec. (cSt)	-	15.0	50.0
Flash point (COC), °C	180	225	-
Total base number (TBN), mg KOH/g	120	140	150
Calcium sulfonate content, % wt.	28.0	35.0	-
Sulfate ash content, % wt.	17.0	20.5	24.0
Condition of usage	Recommended solution temperature of additive in base oil is up to 70 °C. Any devices providing uniformity of stirring of package of additives in base oil can be used for dissolving. Shelf life at ambient temperature – 12 months.		
Safety requirements	Before usage the product please read material safety data sheet (MSDS) of the product.
